

AnyUsers v2.03 for Win32

Program Description	<p>The utility AnyUsers is a command-line-based Btrieve utility that opens up one or more Btrieve database files, as specified by a filespec, in exclusive mode, and immediately closes them again. If any of these attempts to open a file fails, then we assume that that data file is already open by another user. If the attempt succeeds, then no users currently have that file opened (or it is not a Btrieve file).</p> <p>Using the /N or /U switch will return the number of files matching the request as a return code, allowing this program to be used in batch files. One such example would be to confirm that all users are out of the files before running a backup process.</p>
Platform and Package	Win32; Btrieve Utilities Resources & Tools
Pricing	\$50 Single-User; \$100 Site License
Command Line Syntax and Help Screen	<p>AnyUsers Version 2.03: 09/25 (C)2024 Goldstar Software Inc.</p> <p>Usage: ANYUSERS filespec [/A /U /N] [/S] [/P=OwnerName]</p> <p>This command opens each Btrieve file in filespec in Exclusive Mode and reports success/failure to the console. /A Prints ALL results. [Default] /N Prints ONLY files with no other users. /U Prints ONLY files With other users active. /S Prints Summary ONLY. /O=owner Specifies the Btrieve Owner Name.</p>
Examples and Sample Usage	<p>An example use of AnyUsers is shown below:</p> <pre>ANYUSERS C:\PVSW\DEMOTDATA*.MKD ANYUSERS Version 2.03: 09/25 (C)2024 Goldstar Software Inc.</pre> <p>File \pvsw\demodata\BILLING.MKD has no users. File \pvsw\demodata\CLASS.MKD has no users. File \pvsw\demodata\COURSE.MKD has no users. File \pvsw\demodata\DEPT.MKD has no users. File \pvsw\demodata\ENROLLS.MKD has no users. File \pvsw\demodata\FACULTY.MKD has no users. File \pvsw\demodata\PERSON.MKD has no users. File \pvsw\demodata\ROOM.MKD has no users. File \pvsw\demodata\STUDENT.MKD has no users. File \pvsw\demodata\TUITION.MKD has no users.</p> <p>10 Files With No Users. 0 Files With Users Active.</p> <p>Note that the switches can be used to quickly eliminate extraneous information. If you simply want to see which files are currently opened by users, the /U switch will show this very quickly.</p>
Other Information	<p>A DOS version is also available.</p> <p>For more information on these utilities contact us at www.goldstarsoftware.com</p>
Version History	<p>Version 1.0: First Documented Version</p> <p>Version 2.0: Created Win32 version; Added GSLic capability.</p> <p>Version 2.01: Updated licensing code.</p> <p>Version 2.02: Added 32-byte owner name support.</p> <p>Version 2.03: Added support for hexadecimal owner names.</p>
Known Problems	<p>This version of AnyUsers has a known side-effect – it opens the files in exclusive mode. While this detects that no users are in the file very easily, it can also</p>

interfere with proper operation of an application. Use with caution!
