

LicMover v2.11 for Win32

Program Description	<p>The LicMover tool provides an easy way to migrate Pervasive.SQL V8, PSQLv9, and PSQLv10 license information from an existing server to a new server. It can be extremely useful when a site has lost their database license key and is not able to purchase a new one.</p> <p>Notes: The current version does NOT work on PSQL7 or PSQL2000i, and it may not work on future versions.</p> <p>This program is available in a full version only; no evaluation version is available.</p>
Platform and Package	Win32
Pricing	\$100 Single-User; \$250 Site License
Command Line Syntax and Help Screen	<p>LicMover Version 2.11: 10/09 (C)2015 Goldstar Software Inc.</p> <p>Usage: LICMOVER [/Efilename][[/Ifilename]]</p> <p>This command exports or imports the Pervasive.SQL License Data.</p> <p>/C Clears all license data on the current computer.</p> <p>/E Exports license data to the specified filename (Default = LICMOVER.LIC).</p> <p>/I Imports license data to the specified filename (Default = LICMOVER.LIC).</p>
Examples and Sample Usage	<p>On your original server, export your current Pervasive.SQL V8 or Pervasive PSQL v9 license data by running the LicMover application with the /E switch. It will create a file LICMOVER.LIC which contains your license data from your PSQL engine.</p> <p>On the new server, verify that the engine is shut down, then import the data by using the /I switch from the same directory in which the LICMOVER.LIC file exists.</p> <p>When working with multiple servers, it may be helpful to specify the filename for each server, immediately after the /E or /I option.</p> <p>The /C switch clears existing PSQL license data and can be useful for removing older licenses (e.g. PSQLV8 temporary licenses) from a PSQLv9 system).</p>
Other Information	For more information on these utilities contact us at www.goldstarsoftware.com
Version History	<p>Version 1.0: First documented version</p> <p>Version 2.0: Added GSLic capability.</p> <p>Version 2.1: Restricted ability to clear and load licenses to registered copies only.</p> <p>Version 2.11: Updated licensing code.</p>
Known Problems	None.
