

MakeBat v2.01 for Win32

Program Description	MakeBat is a utility that accepts text as input and for each line of that text, puts an optional prefix and suffix on it. Its primary purpose is to create batch files from the output of other commands.
Platform and Package	Win32; Goldstar Utility & Management Package
Pricing	FREE
Command Line Syntax and Help Screen	<p>MakeBat Version 2.01: 10/09 (C)2015 Goldstar Software Inc. FREE Tool! Get more from http://www.GoldstarSoftware.com.</p> <p>Usage: MAKEBAT "Prefix" ["Suffix"] This utility reads a file from stdin, adds the prefix and optional suffix, and writes the results to stdout. Use quotes around the text to include spaces or other special characters. Specify "" for the Prefix if you only want to add the Suffix.</p>
Examples and Sample Usage	<p>To create a batch file which makes a backup of all BTR files in a directory to a subdirectory called BACKUP:</p> <pre>DIR *.BTR /B MAKEBAT "XCOPY " " BACKUP" >BACKUP.BAT</pre> <p>Note that the DIR command creates the list of files, and the MAKEBAT command adds the COPY command and the destination. The output of MakeBat is sent to the BACKUP.BAT file, which is now ready to use.</p>
Other Information	<p>MakeBat is part of the Goldstar Utility & Management Package.</p> <p>A DOS version is also available.</p> <p>For more information on these utilities contact us at www.goldstarsoftware.com</p>
