

RemFile v2.1 for Win32

Program Description	<p>RemFile provides to remove extraneous lines from a text file. It accepts input one line at a time from stdin, compares the string to the provided substring, and outputs only those lines that do NOT contain the substring.</p> <p>A second option (/E) allows users to easily remove blank lines (those containing CR, LF, Tab, and Space characters only) from the output.</p>
Platform and Package	Win32; Goldstar Utility & Management Package
Pricing	FREE
Command Line Syntax and Help Screen	<p>REMFIL Version 2.1: 10/24 (C)2008 Goldstar Software, Inc.</p> <p>Usage: REMFILE <substring> [/E] [/D]</p> <p>This utility reads a text file from stdin, searches for the given <substring> text, and if that text exists in the line, does NOT write the line to stdout. If the text does not exist, it DOES write it. This is useful to cull lines containing specific text from a listing.</p> <p>Options are:</p> <ul style="list-style-type: none">/E Remove Only Empty Lines (ignores substring)./D Turn on Debugging Messages.
Examples and Sample Usage	<p>To remove messages about the workstation engine from a PVSW.LOG file:</p> <pre>REMFIL WSE <C:\WINDOWS\PVSW.LOG >C:\WINDOWS\PVSW.BAK DEL C:\WINDOWS\PVSW.LOG REN C:\WINDOWS\PVSW.BAK PVSW.LOG</pre>
Other Information	<p>RemFile is part of the Goldstar Utility & Management Package.</p> <p>A DOS version is also available.</p> <p>For more information on these utilities contact us at www.goldstarsoftware.com</p>
